PROFESSIONAL SUMMARY

Data analytics professional with 4+ years of experience building SQL-based financial datasets, Python ETL/ELT workflows and reliable reporting assets. Work across billing, invoicing, payments, reservations and ERP sources, focusing on dimensional modeling, data quality, reconciliation to source systems and stakeholder-ready finance metrics. Hands-on project experience with dbt, Apache Airflow and Docker.

TECHNICAL SKILLS

Languages: SQL (SQL Server, Oracle, PostgreSQL), Python (pandas, NumPy), VBA

Financial Data: Billing, Invoicing, Payments, Revenue Reporting, Cash Flow, Financial Reconciliation, ERP Integration

Data Engineering: dbt, Apache Airflow, ETL/ELT Pipelines, Data Warehousing, Dimensional Modeling, Fact Tables, Data Grain, Docker

Data Modeling & Quality: Data Transformation, Historical Reporting, Data Validation, Data Lineage, Source-to-Report Traceability, Root Cause Analysis

BI & Reporting: Streamlit, Power BI, Tableau, Power Query, IBM Planning Analytics (TM1), KPI Reporting

Automation: Python Automation, Alteryx, Power Apps, UiPath, Jira, Agile, Finance Stakeholder Requirements

PROFESSIONAL EXPERIENCE

Data Engineer | *Movatoo Assets, Warsaw, Poland, 05/2025 – Present*

• Design SQL-based finance datasets integrating hotel reservations, invoices, payments and transaction-level revenue for reporting and reconciliation.

• Develop daily-grain reservation and invoiced-revenue fact datasets, transformation logic and reusable reporting views for finance analytics.

• Build SQL and Python data preparation workflows, applying validation checks and root cause analysis to source-system discrepancies.

• Develop Streamlit executive dashboards for revenue, occupancy, ADR, RevPAR and monthly financial performance.

• Reconcile cash, card and bank-transfer transactions across booking channels, tracing exceptions back to receipts and settlement records.

• Develop a Power Apps and SharePoint invoice registration and approval solution with document handling, status tracking and change history.

• Partner with finance and operations stakeholders to define metric logic, reporting requirements and reliable data outputs.

Data Analyst | *PepsiCo, Bern, Switzerland, Remote/ Contractor, 04/2025 – 04/2026*

• Built ERP data extraction and transformation workflows for integration with IBM Planning Analytics (TM1) finance planning datasets.

• Standardized source mappings and validation rules to improve consistency and traceability of planning and reporting data.

• Delivered recurring finance reports from transformed datasets, supporting reporting accuracy and month-end processes.

Finance Data Analyst | *PepsiCo, Krakow, Poland, 02/2023 – 08/2024*

• Managed consolidated budgeting and forecasting datasets spanning 20+ workbooks and multiple finance source systems.

• Produced 21 monthly forecast, actuals and reconciliation reports for finance stakeholders.

• Automated recurring ETL and reporting workflows using Python, SQL and Alteryx, reducing manual data preparation.

• Built Python, VBA and UiPath automations, including an ERP extraction process saving approximately 120 minutes per week.

• Developed Tableau reporting outputs to communicate month-end financial performance and business metrics.

• Investigated financial data inconsistencies through source comparisons, validation and root cause analysis.

Data Analyst | *DPDgroup IT Solutions, Warsaw, Poland, Project-Based Contract, 03/2022 – 09/2022*

• Supported billing and invoicing system implementation, migrating and validating data with PostgreSQL-based ETL workflows.

• Improved data integrity through data comparison, discrepancy investigation and corrective validation rules.

Business Analytics Team Member | *Information Technology Group, Istanbul, Turkey, 07/2020 – 12/2020*

• Worked on vSRM CRM / Supply Chain Management platform projects for three major client companies.

• Developed BPMN business process models for reports and dashboards, applying PMI and Agile methodologies in Jira.

EDUCATION

Master in Management | University of Economics and Human Sciences, Warsaw, Poland, 03/2021 – 02/2023

Bachelor in Industrial Engineering | Istanbul Technical University, Istanbul, Turkey, 10/2016 – 02/2020

Relevant coursework: Statistical Modelling, Probability, Statistical Time Series Forecasting, Operations Research, Data Structures and Object-Oriented Programming, Supply Chain Management

CERTIFICATIONS

- Machine Learning Course – Clarusway (2022)
- Data Science Course – Clarusway (2022)
